

HYPERSN 3D HOLOGRAPHIC SIGNAGE

EH Teasley & Co. now offers HYPERSN products and services to customers in the USA! HYPERSN is a young technology company responsible for developing the innovative and disruptive 3D holographic system that provides an immersive experience for viewers. From the global HQ in London, HYPERSN services its partners and customers across the globe. The company, founded in 2011 and initially backed by Sir Richard Branson has recently attracted additional investment from Mark Cuban among others.

HYPERSN is a complete, integrated system that allows the ability to create, display and manage 3D holographic visuals perceived as holograms floating in the air. It uniquely combines the HYPERSN device with the scalability of the Pro Management Software and the wow-factor of 3D holographic content. HYPERSN has revolutionized the concept of digital signage and visual advertising by creating a disruptive, powerful means of reaching out to target audiences and converting them into actual customers.

While HYPERSN is truly best seen in person, you can get a little taste of the action and captivating nature of the technology by visiting our YouTube channel here
(<https://www.youtube.com/channel/UCmRLraBm3cu9F821a7yxyvA>).

Contact us (/contact-us) for an estimate, idea, or brainstorm – we're here to help!
